- JAVA
- PYTHON
- SQL
- MATHEMATICS \$

STATISTICS

SOFT SKILLS

- Problem-Solving
- Critical Thinking
- Time Management
- Communication Skills
- Team Collaboration

PROFILE

Aspiring Data Scientist with a strong foundation in Python, statistics, and machine learning. Skilled in data cleaning, analysis, and visualization to extract meaningful insights from data. Passionate about solving real-world problems using data-driven approaches and continuously learning new technologies.

EDUCATION

Bachelor of Engineering (Information & Technology)
Shantilal Shah Engineering College (2023-2027)
CPI: 8.05

PROJECTS

Fix N Drive – Vehicle Service Management System

- Developed a web-based platform that allows users to book vehicle repair and maintenance services online. Implemented features such as service booking, mechanic availability tracking, cost estimation, and service status updates. Designed an intuitive interface and built a secure backend using PHP and MySQL for efficient data handling.

Real-Time Currency Converter

- Built a real-time currency converter using Python by integrating a live exchange rate API. Implemented a user-friendly interface that enables users to select source and target currencies and perform accurate conversions with proper error handling.

ACHIEVEMENTS

- Successfully learned core programming concepts and applied them in practical mini-projects.
- Contributed to technical events, workshops, or seminars.
- Successfully solved multiple coding problems on platforms like HackerRank or LeetCode.
